MAGNETIC RAILINGS

The magnetic railings attract and hold any ferrous metallic particle. They so eliminate the accidental passage of tools, screws, bolts, blades, etc. in the screw of plasticizing. They consist of ferrites with high attraction power, sheathed by cartridges in brass. Possibilité of railing with sheath of netoyage STAINLESS STEEL.

GR 200	200 mm	20 Ferrites
GM 200	200 x 200 mm	24 Ferrites
GR 300	300 mm	48 Ferrites
GM 300	300 mm	60 Ferrites
GR 400	400 mm	92 Ferrites
GM 400	400 x 400 mm	112 Ferrites

Special magnetic railing on request

GM 130	130x 130 mm	12 Ferrites
GM 166	130 x 166 mm	16 Ferrites
GM 500	500 mm	187 Ferrites

MAGNETIC PLATES

The magnetic plates are essentially used in the entrance of a crusher. They avoid any deterioration of blades by holding the ferrous metallic particles. Dimensions useful part:

180 x 250 mm
180 x 370 mm
180 x 490 mm
304 / 424 / 544
250 / 370 / 490
